# **ITALDOORS**

**TWO PRODUCT TYPES:  
EXTERIOR AND INTERIOR DOORS**

THE FIRST THING PEOPLE SEE AND THE LAST LINE OF DEFENSE

# EXTERIOR DOORS

An entry door is not only an entrance, it protects the property, seals against weather, reduces noise, and creates the first impression of the home or business. ITALdoors exterior doors combine Italian engineering with certifications required for Florida weather and the US Market.

## CERTIFICATIONS & PERFORMANCE

Fire Rating: 120 min UL Fire Rating Certification

Impact Resistance: Miami-Dade Notice of Acceptance (NOA) and Florida Product Approval (FPA)

Thermal Insulation: Full thermal barrier

Acoustic Insulation: Noise reduction for urban and coastal areas

Weather Protection: Sealed against air drafts and atmospheric agents

Break-in Resistance: Reinforced security construction

---

## DOOR TYPES

Pivot · Hinge · SkyDoor

---

## AVAILABLE MATERIALS

Wood · Steel · Glass · Iron · Stone and Porcelain

---

## STYLES

## WHAT'S INCLUDED IN EVERY PACKAGE?

Door Slab · Frame · Casing · Concealed Hinges · Magnetic Lock · Handle

One complete package. In Stock. Ready to install — a customized in-stock door solution designed for faster turnaround time and seamless installation.

# WHY ITALDOORS?

BECAUSE ITALDOORS ISN'T JUST SELLING DOORS—IT'S SOLVING THE BIGGEST FRUSTRATIONS PEOPLE FACE IN PROJECTS: DELAYS, UNCERTAINTY, AND LACK OF DESIGN CLARITY.

## HERE ARE THE REAL REASONS PEOPLE CHOOSE ITALDOORS:

### 01

Speed without compromise. Most “custom” doors take months. ITALdoors delivers premium Italian doors in as little as 2–6 weeks, so your project doesn't stall.

### 02

True Italian quality (not a look-alike).

These are not imitation European styles — they're manufactured in Italy, with the craftsmanship, materials, and detailing that designers actually want.

### 03

In-stock advantage = predictable timelines. No guessing, no “waiting on production.” Popular styles and sizes are available locally, which means: faster installations; fewer delays; happier clients.

### 04

Transparent pricing. No hidden fees, no surprise tariffs. What you see is what you plan for—critical for developers, designers, and homeowners.

### 05

Designed for architects, builders, & designers. When brought in early, ITALdoors helps: optimize layouts, select correct door systems (frameless, sliding, pivot, etc.), avoid costly redesigns later.

### 06

Complete door solutions — not just slabs — full packages: doors, hardware, systems (sliding, concealed, flush). Everything works together; aesthetically and technically.

### 07

Elevated design impact. Doors are one of the most touched elements in a space. ITALdoors turns them into a design feature, not an afterthought: clean lines; modern finishes (linen, matte, lacquered); seamless integration into interiors.

### 08

Built for real-life performance beyond looks: durability; functionality; energy efficiency; humidity resistance; options for exterior, fire-rated, and hurricane-ready doors.

**DESIGNERS KNOW...  
DOORS ARE NOT AN AFTERTHOUGHT**

**They're the first touch. The final detail.  
And the difference between good and unforgettable.  
ITALdoors — Italian doors, ready when you are.**

**20 YEARS  
SERVING THE  
U.S. MARKET**

## **MANUFACTURED IN ITALY**

Every door is manufactured in Italy using an engineered pine wood with MDF layer and hard grade laminate or veneer — a stable structure designed to resist warping, movement, and humidity. Crucial for Florida climate.

Glass models feature laminated safety glass with a 7mm white laminate insert that prevents shattering upon impact while allowing natural light to pass through — also providing enhanced privacy.

Hardware operates on concealed Italian hinges, steel handle and magnetic latch lock. Sleek design, noiseless operation, lasting quality.

Standard size is 36" W x 84" H and matches common rough openings used in Miami and Florida construction. In-stock doors customized to your opening.

Custom sizes are available in stock. Up to 96" H.

Frame Width: starts at 4.5", extendable to 9" to fit wall thickness. Casing: 2<sup>3</sup>/<sub>4</sub>".

Standard Door Frame Dimensions: Standard frame width starts at 4.5" and accommodates wall thicknesses up to 5.5". Wider walls require extension jambs. Standard casing width is 2.75". Door slab thickness is 1.75".

Fits standard openings out of the box — no modifications, no guesswork.

Need larger dimensions? Custom sizing up to 54 W" x 96"H and beyond available on request for pockets, bypass and barn doors. One order. Fully ready to install. No hidden add-ons.

# LEAD TIMES & LOGISTICS
